Are You Alive

to the fact that you are a potential asset to the Singletax movement?

Or Are You Dead

to the consideration of how you might be numbered of those whose presence in the world has helped to make it better? In either case

Wake Up

and realize that swalling the list of contributors to the Fels Fund you will encourage others to assist the movement. This list will be done in a permanent booklet for wide circulation. No matter what your contribution your name will be included and there will be no way to distinguish large contributions from small ones.

about the need we have of your help. We need it badly and we need it now. We ought to hear from you at once.

We want you to realize that a long list of contributors giving 10 cents each, will do more to stimulate interest in the Singletax movement than a dozen names, aggregating thousands. So if you have not yet contributed

Do It Now.

Your moral support is as valuable as your financial support, and though we welcome contributions in large amounts, don't imagine for an instant that the smaller, yes the smallest contributions, are not wanted and will not be of immense help.

We want the names of 250,000 at 10 cents each. Such a list would surely make supporters of monopoly

Sit Up And Take Notice.

Such a list requires your name. No objection to your sending or pledging a larger amount, but let us have your name. This will be a valuable contribution in itself.

We can use postage for the smaller amounts of one dollar and under.
