

## World Warfare or Earth Share? That is the Question!

By Alanna Hartzok / 7 January, 2026

Posted to: Aradhana Airwaves

The perspicacious Russian political analyst and philosopher Alexander Dugin had hopes for a genuine partnership between Russia and the US under the leadership of Putin and Trump. Dugin was cautiously optimistic after their meeting in Anchorage. But with the blatant grab of Venezuela by Trump, this great man has had a huge change of mind and heart. In his most recent [article](#) and interview titled *After Maduro Might Makes Right* Dugin states:

There is no international law. There is only the law of force.... We are inside a Western with very harsh principles and a struggle of all against all.... In this game without rules, Russia must win by any means necessary. ...our strengths are warrior bravery, courage, and faith. God is on our side: “Tremble, nations, and submit, for God is with us.”

Oh My God (whose God, “My” God???) The astute deeply thinking Alexander Dugin has just coherently articulated a reason for “Just War” straight out of [Augustine](#) who provided the rationale for why pacifist Jesus people (Christians adhering to Thou Shalt Not Kill) should in fact KILL PEOPLE!

The Venezuela attack is simply the current US hegemonic full spectrum dominance business as usual and without surprise to those of us studying geopolitics for the past several decades. The gut punch for me is Dugin’s transformation from rational peacenik to full blown rabid warmonger propelling urgency for the Russian people to now fully engage in World War III!

So I left this message to him in the comments section of his substack:

Dear Dr. Alexander Dugin,

I hereby appeal to you to write an open letter directly to the people of the United States because the hegemonic thrust of our country is not only threatening the Russian people and yes, the entire world it is also destroying the well-being of people living inside of the monster. Basic needs for affordable housing and even food for increasing millions of us are not being met. For instance, in the city of Baltimore significant numbers of people are experiencing food insecurity. There are so many homeless people everywhere even in the small town where I live in Pennsylvania.

The work and writings of our great American political economist who revealed the root causes of gross wealth and power inequality and what to do about these crucial concerns - Henry George - were sidelined and obfuscated with the corruption of economics and the establishment of neocon economics that underpin the elite rule system of the USA. Now 400 billionaires have as much wealth as the bottom 50% of the population.

Your wise moral philosopher Leo Tolstoy was a great admirer of Henry George and urged Tsar Nicholas to implement the key policy that would have made the Russian economy both free AND fair.

Our "earth rights" movement is working both within the US and worldwide. We perceive a clear way forward to harmonize and indeed transcend the political left and right which currently has us deeply divided via a dysfunctional, devious, destructive and devastating *faux* political economic paradigm, or as we sometimes view it, to move beyond **the power that should not be**.

Might you please use your mighty intellect to help bring the teachings of Henry George and Leo Tolstoy out into the world? Here are links to the two parts of my now very relevant article *Financing Planet Management: Sovereignty, World Order and the Earth Rights Imperative*:

<https://alannahartzok.substack.com/p/financing-planet-management-partB>  
<https://alannahartzok.substack.com/p/financing-planet-management-part-7de>

Dr. Benjamin B. Ferencz, Prosecutor Nuremburg War Crimes Trial and until his recent death Adjunct Professor of International Law, Pace University said about this view of sovereignty and earth rights:

"AH has recognized that the earth is the birthright of all people and that prevailing notions of state sovereignty must yield to the new thinking that the only real sovereigns are the people. If we are all to live together in peace and dignity it must become a reality that the land, the sea, and the air we breathe are a common heritage to serve the basic rights of human kind."
