The foregoing are the works on which I principally relied. In ad-

dition I consulted many other books, articles and papers, including letters in the Henry George manuscript collection of the New York Public Library, and all indexed references to George or the single tax in all the economics textbooks mentioned in Chapter 15. (Bibliographical data on these sources are given wherever they are cited in the *Notes*.)

#### *Other Sources*

Material on the ongoing movement was derived from attendance at Henry George School classes, first as student and later as spectator; from intermittent attendance at meetings from 1950 to 1979 including eighteen of the annual national conferences; and from articles in miscellaneous Georgist periodicals, notably the *Henry George News*.
