Dear Alana and all IU members,

Here is a brief report of our

Equinox Earth Day Event in Buenos Aires, Argentina:

*On the occasion of the **Equinox Day**, we have held a **zoom meeting attended by members of the Institute of Economic Studies Silvio Gesell from Argentina** and other guests (about 20 people attended).*

*In the meeting, a few hours before the equinox, on March 19th, **we have expressed our adhesion to the IU in the celebration of this day** and introduced the meaning we give to the Equinox Day as Earth Day.*

Then the two speakers and vice presidents for Argentina of the IU spoke: Dr. Carlos F. Louge and Engineer Guillermo Andreau.

***Dr. Louge** (President of the Gesell Institute) spoke about the **rich and pioneering history in Argentina of the Economic School of the Río de la Plata and the long tradition of the ideas of land rent payment** since our first years of independence and contained in the spirit of our National Constitution, although later discarded by subsequent legislation, etc.*

*Then **Eng. Andreau** (activist and specialist in the subject of tax reform and land rent) gave a very interesting talk on "**Tax reform to avoid the third world war and the wars for land**".*

Finally, we had a debate with questions and answers in which members of the Spanish speaking community from other countries of the IU (Colombia, Brazil, UK, US), also participated and in which we had the joy of being able to connect online with the IU group that was celebrating at the same time in New York with the IU president. 🌱🌍

*The talk was recorded, edited and **subtitled in three languages (Spanish, English and German)** to be shared among those interested and in our networks. At the end of this message, you can find the link to watch it.*

In the same week, already in the new season, we met with the Fiscal Affairs Commission of the Gesell Institute in a working breakfast. Then we marched to an emblematic point of the city of Buenos Aires, the Obelisk, where we took a picture with the members of the Commission, marking the Equinox-Earth day event with our allusive banner (the same day of the equinox we had to suspend a meeting with a larger number of interested people due to a very strong storm that lasted the whole day and practically paralyzed the city).

All in all, it was a very motivating and fulfilling celebration.

You can watch our zoom meeting and conference on Equinox Earth Day [here](#) 📌: (ENGLISH AND GERMAN SUBTITLES) (Please use the YouTube tools 🗨️⚙️👉 to see the subtitles you desire).

REFORMA FISCAL PARA TERMINAR CON LAS GUERRAS POR LA TIERRA G. ANDREAU C. F. LOUGE I E E S G

DÍA DE LA TIERRA 2024 : 🌍 CONFERENCIA SOBRE LA REFORMA FISCAL Y MONETARIA conforme al Orden histórico tradicional argentino, Pensamiento de Mayo y Economía N...
