

William G. Leon

In 1937 a bright and attractive young man, barely past the first score years of his life, enrolled as a student in the fundamental course at the original school headquarters in New York. The occasion is impressed indelibly upon my memory as that day I, too, started as a student in the same classroom, with Lancaster M. Greene as our instructor.

Bill Leon was the "baby" of our class; his precocious qualities were stimulating and challenging to the rest of us. His study and devotion to the principles of Henry George were as clear, honest and devout as his personal faith.

When he passed away on August 12th he left the world richer; during his short stay on this earth he was a valued teacher who passed on to many others the economic principles and philosophy of Henry George. This legacy will remain a living memorial to Bill Leon.
